

INSULATING WINDOW INSERTS

Things to consider:

- Will you need help putting in and taking out the inserts?
• Do you have a place to store them in warmer weather?
• Do you have room in your car/truck to pick up the inserts at the community build?

Ask us for help if you need it.

WindowDressers Insulating Window Inserts let in light while stopping drafts. Each insert is made of a custom-made pine frame wrapped on each side with tightly-sealed, clear polyolefin film, creating an airspace between the two layers for additional insulation.

The insert is finished with a compressible foam gasket. The foam allows enough give for the inserts to be easily slid into place in the fall and removed in the spring, while holding firmly enough to provide a tight, friction-based seal.

The inserts are installed inside of your existing window frame with no fasteners required.

We keep our insert-prices exceptionally low (50%-75% cheaper than commercial products) through our non-profit model of cooperative insert-building.

The inserts are low cost for middle and high income households. Reduced prices or no cost options are available too. Let us know if you need financial assistance.
